

Global 3000 Enhancement Note

Transaction Purge/Archive Dialogue

Author	Rick Robinson	
Project	Document1	
Version	1.0	1 of 2

INTRODUCTION

This service pack is an enhancement to the dialogue of the purge/archive transaction function to display the date after which transactions are deleted.

At the moment the dialogue presented to the user show the current period date and states "All transactions from periods prior to the above will be deleted or archived.", when in fact the deletion of transactions is dependent on a system parameter that defines a lead time to keep all transactions for.

DOCUMENTATION CHANGES

Close Period Window

- Year, period, ending** *(Display only)* Details of the current period are displayed here. All closed transactions from this and earlier periods will be archived and will no longer appear in reports and enquiries of open transactions.
- End of the new current period** *(Display only.)* The last day of the new period as defined in the calendar in Administration Parameters.
- Purge period** *(Display only)* Details of the purge cut-off date are displayed here. Archived transactions dated earlier than this date will be purged.

Transaction Purge Window

- Year, period, ending** *(Display only)* Details of the current period are displayed here. All closed transactions from periods prior to this period will be archived and will no longer appear in reports and enquiries of open transactions.
- Purge period** *(Display only)* Details of the purge cut-off date are displayed here. Archived transactions dated earlier than this date will be purged.
