

Global 3000 Service Pack Note

Stock Movements Report - Specific Product Group

Author	DCP	
Project	ZI60_000041.doc	
Version	1.0	1 of 2

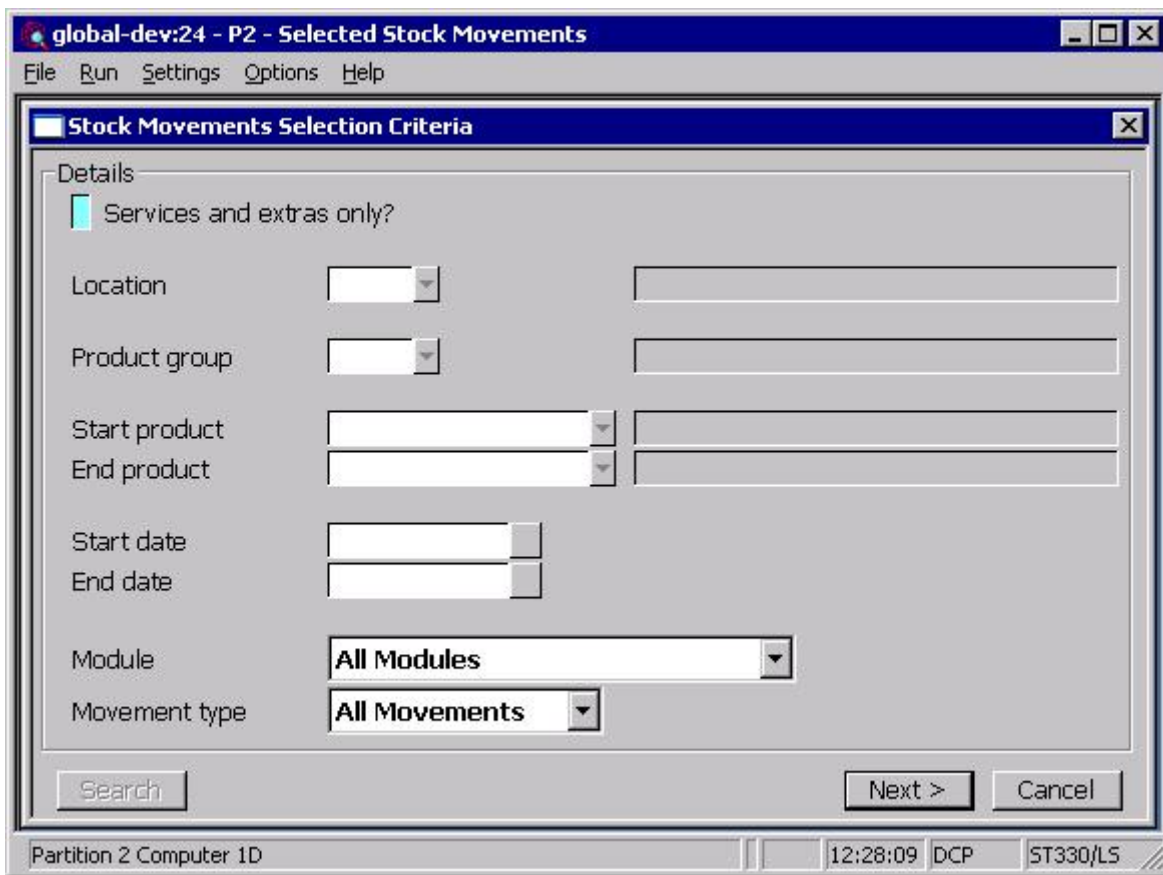

INTRODUCTION

This service pack extends the 'Selected stock Movements Report' so that it can be limited to products within a specific product group.

The changes extend the Selected Stock Movements Report to allow it to be printed for a specific product group. A new prompt (labelled "Product group") has been added to the report criteria. This allows the report to be printed for either a specific or all product groups in line with other stock control reports.

DOCUMENTATION CHANGES

Selected Stock Movements Report – Criteria Window

Product group Set this to be limit the report to products within a specific product group. Alternatively leave this blank to print the report for all product groups.
