

Global 3000 Service Pack Note

Zero Purchase Costs For Assets

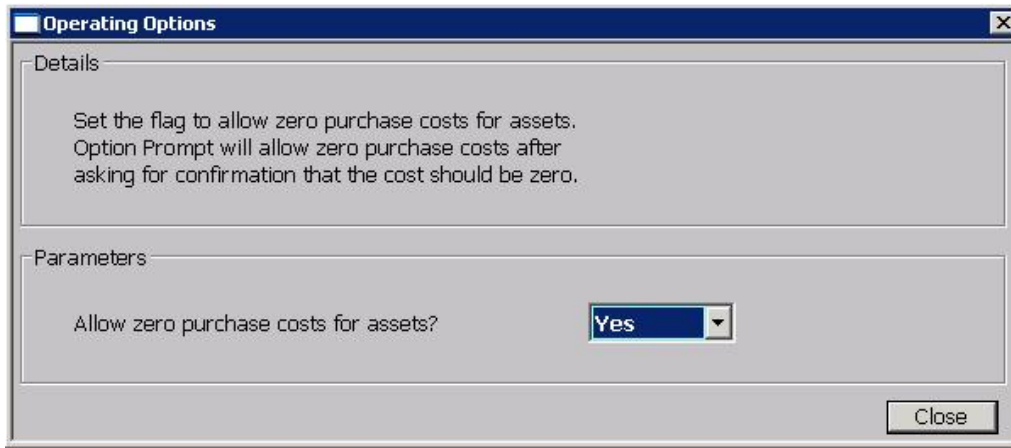

Author	MPH		
Project	ZA60_000006.doc		
Version	1.0		1 of 4

INTRODUCTION

This service pack introduces a new “Operating Options” menu entry on the Parameter Maintenance menu in Asset Register System Parameters. The Operating Options window contains a new parameter flag which can be set to allow zero purchase costs on assets in Asset Maintenance and Asset Data Load. The parameter options are “Yes” to allow zero purchase costs for assets, “No” to prevent zero purchase costs for non-template assets and “Prompt” to allow zero purchase assets costs for non-template assets on confirmation from the user. The parameter flag is defaulted to “Yes”.

System Maintenance, Asset Register, Maintain Parameters, Operating Options

This window appears when you select Operating Options from the Parameter Maintenance menu in Asset Register System Parameters

Purpose This window is used to set the parameter flag to allow zero purchase costs for assets.

The prompts are:

Allow zero purchase costs for Assets Parameter flag to allow zero purchase costs for assets. This is defaulted to “Yes”. When it is set to “No” only assets with template status may have zero purchase costs. When it is set to “Prompt” the user will be warned if the purchase cost is zero for a non-template asset and asked to confirm that they wish to continue.

Buttons:

Close This saves the settings and returns to the System Parameters, Asset Register Parameters, Parameter Maintenance menu.

Asset Maintenance

Purchase Details

Purchase cost Enter the purchase cost of the asset. This can be zero on a template asset or when the zero purchase costs for assets parameter flag is set to “Yes” or “Prompt” in System Parameters, Asset Register, Maintain Parameters, Operating Options.
