| Version | 1.0             | 1 of 6 |

#### INTRODUCTION

This service pack improves standing order and repeating order handling in Cash Manager..

This service pack makes the following improvements to standing and repeating orders:

#### Tax Analysis and General Ledger Analysis Windows

When setting up standing and repeating orders, the depth of the Tax and General Ledger Analysis windows has been increased.

#### Standing Order generation

Standing orders which have not had a transaction generated in the current period are highlighted and a new tick box is available for each so that they can all be generated in a single batch for each type of order (payment and receipt). The option to add to existing batches is still be available. If no suitable batch is found, the batch window is not displayed and the user is asked to confirm that they wish to create a new batch. Note that since existing standing orders are generated whenever a period is opened this will only apply to standing orders which do not have a transaction generated when they are created.

#### **Repeating Order generation**

For repeating orders there is now an option to tick those that require generation and enter a transaction date for each. The ticked orders are then generated in a single batch for each type of order (payment and receipt). The option to add to existing batches is still available. If no suitable batch is found the batch window is not displayed and the user is asked to confirm that they wish to create a new batch.

#### Access to repeating orders from transaction entry

A new button (labelled 'Repeating' has been added within transaction entry, this allows a repeating order to be selected and added to the current batch.

#### Access to repeating orders from bank reconciliation

A new button (labelled 'Repeating') has been added within bank reconciliation, this allows a repeating order to be selected and added to the current statement page as a statement direct transaction.

|             |                      |      |            |         |          |               |            |     |
|             |                      |      |            |         |          |               |            |     |
| etails —    |                      |      |            |         |          |               |            |     |
| arrative    |                      |      |            |         |          | Frequency     |            |     |
| eference    |                      |      |            |         |          | Number of tim | es         |     |
|             | 101001               |      |            |         |          |               |            |     |

|         | This window appears when you press the Standing Orders button in the General Details of Cash Books Window   |
|---------|---|
| Purpose | This window enables you to set up standing orders for the selected cash<br>book. The first standing order transaction can be created in the period in<br>which the standing order is entered. Subsequently Standing Orders are<br>processed by the Close Period program, which creates transactions in<br>the new period for each standing order which requires it. |

| Order no | Enter a number (up to two digits) to identify the repeating order. This must be different from any number used to identify a standing order.   |
|----------|--|
| Note     | This field is highlighted if no instance of the standing order has been<br>generated in the current period. If this is so, an instance may be<br>generated by ticking in the "Gen" column and, when all the required<br>orders are ticked, selecting "Generate". |

| Gen | (Only if the order number on the line is highlighted or a new order<br>starting in the current period is being entered) Set to generate an<br>instance of the standing order in the current period when "Generate" is<br>selected or on exit. The default is set for a standing order in the current<br>period |
|-----|--|
|     | period   |

| On completion | If the transaction is taxable $\Rightarrow$ <u>Tax Analysis Window</u> . This enables you to analyse the transaction across the required tax codes.   |
|---------------|---|
|               | This is followed by the <u>Dissection Analysis Window</u> . This window enables you to distribute the amount of the standing order to the required dissection codes.                                  |
|               | If analysis categories have been set up for the General Ledger account<br>you specify in the Dissection Analysis Window, it is followed by the<br><u>General Ledger Transaction Analysis Window</u> . |

| On exit | If the Generate button is lit, (i.e. while there is a least one standing order ticked for generation) you are asked to confirm that you wish to generate the ticked orders   |  |  |
|---------|--|--|--|
|         | <ul> <li>o if suitable batches are open in the current period ⇒ <u>Batch</u><br/><u>Selection Window</u> to allow you to select a batch for the<br/>transactions.</li> </ul> |  |  |
|         | <ul> <li>if no such batch is available you are asked if you wish to<br/>create one.</li> </ul>   |  |  |
| Note    | If you have selected both Payment and Receipt orders, the batch selection process is repeated for both batch types.  |  |  |
|         | You are returned to the Cash Book Maintenance Window.  |  |  |

**Generate** (Available if any standing orders have the "Gen" column ticked) Press to complete the generation of the current period instance of any ticked standing orders  $\Rightarrow$  Batch Selection Window.
