

Global 3000 Service Pack Note

Obsolete/Superseded Products

Author	DCP		
Project	ZI60_000053		
Version	1.0		1 of 4

INTRODUCTION

This service pack provides the ability to suppress obsolete and superseded products from the product search and the stock availability reports.

The changes are:

The product search has been extended to provide new buttons labelled “Include Obsolete” and “Include Superseded”, when pressed these control whether or not obsolete and superseded products are included in the list.

The stock availability reports (Stock Levels, Under stocked Items, Over stocked Items, Inactive Items, Expired Stock, Available Stock, Stock on Reorder and the Reorder Report) have been updated to include new runtime options that allow obsolete and superseded products to be included or excluded.
