Service Pack Note

Multiple Bin Handling - New Products

**INTRODUCTION**

Author	DCP	
Project	ZM60_000462	
Version	1.0	1 of 2

This service pack provides the ability to force new products to be held in stock bins.

A new system parameter has been added to the 'Multiple Bin Handling' options. When the new option is enabled product maintenance forces all new products to be held in stock bins.

DOCUMENTATION CHANGES

Distribution Options – Multiple Bin Handling Window

New products must be assigned to a bin?	*(Only available if multiple bin handling is in use).* When this is set product maintenance forces the user to ensure that when a new product is created it is assigned to at least one bin.
Note	If new products must be held in stock bins, product maintenance issues a warning if the stock details for an existing product that is not held in a bin are maintained.
