This service pack provides the ability to disallow part deliveries at product level.

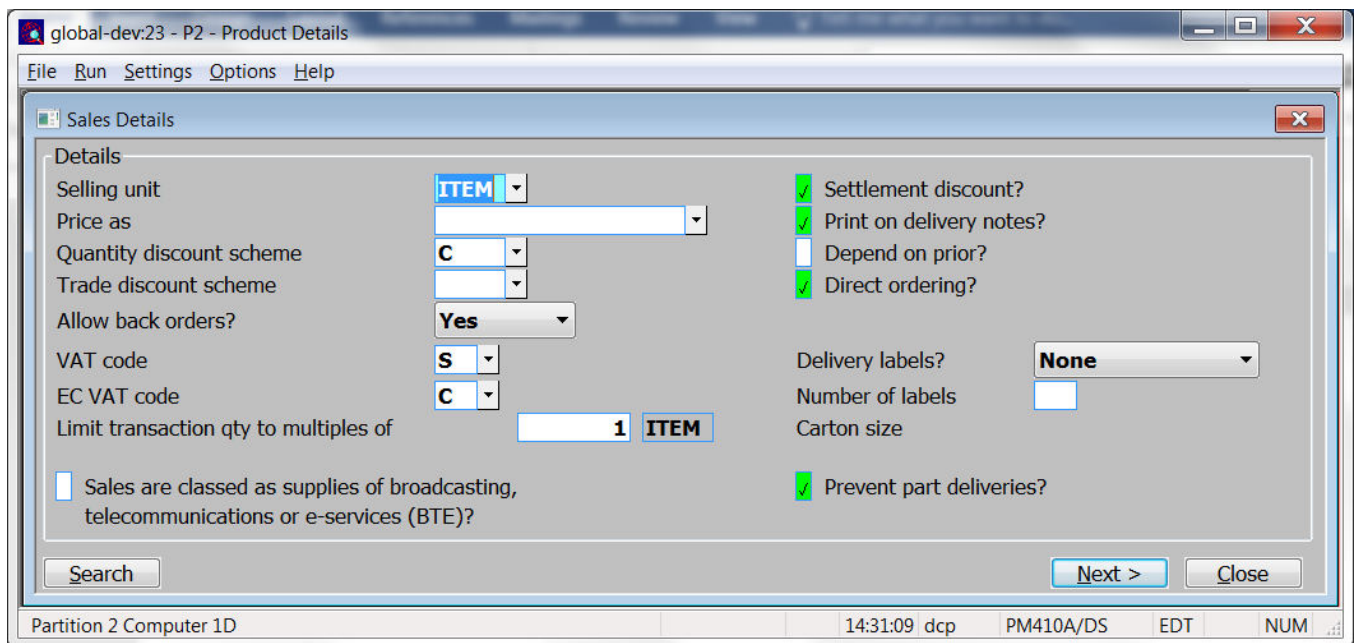

Prior to this service pack, part deliveries could be disallowed for a customer or for an individual order; however they could not be disallowed for a particular product.

The changes introduce a new option (labelled 'Prevent part deliveries') at product level. When the new option is set, part deliveries are not allowed for the product even if they are for the customer and order.

Note, the new option can only be used to prevent part deliveries; it cannot be used to allow them on orders or for customers that disallow them.

DOCUMENTATION CHANGES

Product Maintenance – Sales Details Window

Prevent part deliveries? Set this if this product cannot be part delivered (even when it appears on an order that allows them).

Note The above option can only be used to prevent part deliveries; it cannot be used to allow them on orders or for customers that disallow them.
