Service Pack Note

Minimum Stock Level in SOP
Transaction Desktop

|		
Author	DCP	
Project	ZS60_000246.docx	
Version	1.0	1 of 2

INTRODUCTION

This service pack extends the SOP Transaction Desktop profile settings to include a new option that controls whether or not a message is shown (during line entry) if a products quantity is lower than its specified minimum stock level.

> The SOP Transaction Desktop profile settings have been changed to include a new option labelled 'Warn user when stock level is below the product's minimum?'. If set a warning is shown (during line entry/amendment) if the product's stock level falls below its specified minimum.
>
> Note these changes are only available in the Transaction Desktop and are not available in Sales Order Entry.

DOCUMENTATION CHANGES

Desktop Profile – Configuration Settings Window

Warn user when stock level is below the product's minimum?	When this is set Transaction Desktop issues a warning (during line entry/maintenance) if the stock level for the product falls below its specified minimum.
