

Vertical Products

Over 150 systems houses world-wide have built their industry-specific packages using Global technology, exploiting the power, productivity and user-friendliness of Global System Manager to develop software which links to OneOffice 3000 modules to deliver the individual functionality that your sector demands.

Some of the many sectors addressed, include:

* **Airline Revenue Accounting**

Aviation Accounting Solutions

The Global Airline Revenue Accounting System (**GARAS**) from Aviation Accounting Solutions Limited is a fully-featured and comprehensive suite of programs designed specifically for airlines, and integrates directly with the Global 3000 ledger suite. GARAS represents the creative pooling of over 60 years experience in airline revenue accounting and concentrates on the necessities for today while being flexible enough to handle the changes needed in future. GARAS is a proven and cost-effective solution suited to airlines of all types.

Features include:

- * Handles complex route structures, proration and average yield
- * Uses BSP/ARC/IDEC automated data
- * Produces ACH/IATA billings and clearance forms
- * CAA/FAA statistics
- * Optional full Frequent Flyer system
- * Full and efficient re-issued ticket, tax and commission accounting
- * Forward sales surplus and discrepancy reporting (eg unreported sales, over-billings from other airlines)
- * IATA currency and own rates support

* **Box Plant Management**

Global systems house Abaca Systems Ltd are market leaders in business management systems for the corrugated packaging industry. Abaca's Packaging 3000 is a fully integrated software solution which supports both sheetplants and simplex-knife integrated plants and caters for manufactured and merchanted products.

Packaging 3000 provides full control over all stages of the business cycle, from estimating through sales order, purchase order and works order processing, stock control, machine capacity planning and scheduling, despatch, invoicing and all other accounting functions.

Features include:

- * Comprehensive and up to the minute management information
- * 'Fine tuning' of your costing/estimating to improve cost-effectiveness and profitability
- * Powerful stock management tools, including full traceability and movement history for all raw materials and finished goods
- * Records machine and material usage so you can identify areas of strength and weakness in your production operation
- * Meets the requirements of the Packaging Waste Regulations
- * Links to standard Global 3000 accounting ledgers, sales analysis and Payroll modules
- * User-driven development programme

* Casino Management

Global systems house Timeframe Software Ltd produce the market-leading casino management system, **Punta Hunta**. Punta Hunta is a fully integrated software solution which handles the full range of casino activities including membership control, reception management, cash desk control, table and game monitoring, player tracking, security and marketing data analysis.

Punta Hunta is used throughout the UK and Europe for the profitable management of casinos of all types, and links to standard Global accounting ledgers for complete financial management.

Features include:

- * Extensive records of members, guests and undesirables
- * Fast and efficient validation at reception, using colour photographs and signatures
- * Comprehensive recording of all financial transactions
- * Interaction with online table and pit monitoring systems
- * Comprehensive records of members and guests playing
- * Continuous display of photographs and names of current visitors
- * Data retained for marketing and statistical analysis
- * Links to Global accounting ledgers

* **Grants Administration**

The team at Paradigm Westminster is a specialist in the implementation and support of OneOffice 3000, having been implementing solutions around this software, and its predecessor Global 2000 (BOS), for over 25 years.

The company has produced a number of modules, integrated with OneOffice 3000 software, to provide additional functionality or for industry specific tasks.

Grants Administration

The Grants Administration system is suitable for charities and other grant making bodies. It controls grant requests, approvals, and payments, and provides a complete picture of grants approved, paid out, and not taken up for individual beneficiaries and the organisation as a whole. Grant payments, regular and one-off, can be paid to the beneficiaries or third parties by cheque or bank transfer including overseas payments. All necessary paperwork for beneficiaries or committees is produced by the system. The financial accounts, including grant commitments, are automatically updated. The system can operate stand alone or can be linked to The Raiser's Edge.

Charity Accounting

The OneOffice 3000 Financial Accounting suite has been augmented in order to produce accounts to SORP 2005 and FRS12 standards.

Electronic Forms

The Electronic Forms module allows PDF versions of all OneOffice 3000 standard forms such as purchase orders, invoices and customer statements to be created and e-mailed automatically to the recipients. This is a big cost saver, and e-mailed invoices and statements have been found particularly effective in speeding payment.

Point of Sale and Trade Counter

These add-ons to the OneOffice 3000 Sales Order Processing module are designed for use in retail and trade operations. The order entry function has been streamlined and the modules allow multiple payment methods at the point of goods being taken.

* Job cost and Time Management

[Data One Ltd](#) are strongly customer focused. We provide all the facilities of an in-house IT department for a number of well-established clients.

We support complete network systems including e-mail, faxing, anti-virus and data security. We have extensive knowledge of the Global packages and the expertise to create bespoke or tailored systems.

Overview of Vertical Solutions

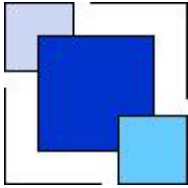

Job Cost and Time Management. A comprehensive materials and manpower costing system which can be tailored to individual requirements.

Costs are applied to a flexible array of centres and the control and reporting system enables tight monitoring of Job Costs against budgets. Purchase Order Processing and Sales Invoicing are integrated.

Timesheet data feeds the Global Gross to Net Payroll as well as the costing system.

Any company requiring complete control over labour and material spend on projects management will find this system invaluable.

* Laundry Management

Global systems house Barcellos Ltd are market leaders in systems for commercial laundries and garment care providers. Their **Workwear** Rental and **Linen** systems offer a complete solution for garment traceability and control, linking to OneOffice 3000 accounting software for management information and sales analysis and to bar code readers and label printers for state of the art customer service. In an increasingly hygiene and image-aware climate, particularly in the food industry, Barcellos can help you deliver what your customers need.

Features include:

- * Garment purchasing and stock control
- * Full rental, split rental and launder only contracts
- * Locker management
- * Invoicing and Sales analysis
- * Linen management
- * Service records/Call logging
- * Fleet and Route management
- * Washroom services
- * Personal protective equipment
- * Nuclear industry specific solution

*** Order Management System**

APH Computers commercial solutions enable businesses to better manage their operations by controlling the key processes that successful organizations focus upon.

Whether you are an importer, distributor or wholesaler, the key to providing good customer service and increased profitability is efficient stock handling. The information management requirements needed to do this are usually beyond the scope of those offered by standard stock control and order processing systems.

The APH Computers Order Management system is designed to specifically meet these requirements and provide the sophisticated stock control procedures that are needed by importers, distributors and wholesalers.

As well as being able to monitor the progress of shipments, the solution enables the use of pick-face and replenishment techniques in racked warehouses. The bonded stock module also enables the operation of a Customs warehouse, with all the cash flow benefits this entails.

The integrated APH Computers Order management system helps to minimise logistics costs, duties, fees and taxes and ensure adherence to compliance regulations, it includes:

- * Sales order processing
- * Sales analysis
- * Contact management
- * Customer service
- * Stock control
- * Warehouse management
- * Purchase order processing
- * Import / job costing
- * Bonded stock
- * Works orders

Mobile Sales Solution

In an ever demanding working environment, we feel it imperative that professionals who are always on the go need to stay connected to the head office at all times.

Our mobile sales solution allows sales professionals to connect to their office via our handheld/PDA applications. The application gives salesmen the tools to optimise their performance whilst in the field using our handheld solution. Sales professionals have the ability to download up to date stock, prices and customer information, while being able to upload sales orders direct to the back office system and communicate with colleagues via email. Other benefits include:

- * Access to customer and product information
- * Capture orders & Immediate order acknowledgments
- * Provide quick stock figures & Price structures
- * Ability to arrange delivery dates
- * Up to date information of Credit information

Experience shows that organisations that use our mobile sales solution benefit from increased productivity, fewer manual and paper based processes and increased customer satisfaction due to improved delivery of products.

Our handheld application has been designed to link directly into the back office Global System, where all ordered will be processed to be delivered to the customer. It has been proven that sales orders are processed with less effort and increased accuracy.

* Textile Manufacturing

Established Global Business Systems partner One Systems Group supply some of the largest Global systems in the UK for quite a number of household names such as Kavli, Westler Foods and Christy Towels.

They specialise in verticals such as; Retail, Textiles, Food Processing/ Manufacturing and Complex Distribution. Over 300 companies in the UK use systems and receive support from One Systems Group.
